

Ketra is available for commercial and residential projects.

For commercial projects, a licensed electrical contractor can install Ketra with a Lutron factory technician performing the startup and programming.

For residential projects, a Ketra Certified Service Provider can purchase, design, install and program Ketra. Here is a list of Ketra Certified Service Providers for the central valley and central coast areas of California that we serve.

Central Valley

Futurehome Systems
Fresno, CA 93711
